

**History(s) from Germany's
green heart:**

Eisenach international

06. - 18.08.2023

Superlatives and traces of history can be found on almost every corner in Eisenach and the surrounding area: Martin Luther's hiding place in the Wartburg, the birthplace of Johann Sebastian Bach, the narrowest house in Germany, the largest villa district... We cordially invite you to explore this region with its rich history, which is also considered the green heart of Germany, with us.

Our work camp will focus on the fates of people from all over the world who are remembered by the war graves of Eisenach's main cemetery. We actively contribute to the preservation of these graves and thus to the memory of these people by taking care of them. We also take a look at more recent history, because just a few decades ago the inner-German border ran nearby, dividing Europe as the "Iron Curtain". How could the democratic transformation succeed and what conclusions can we draw from it today? We will discuss these and similar questions in our international group. In addition, you can expect lots of fun, excursions to the surrounding area, for example to Erfurt, and a varied leisure programme.

Camp language is English.
